Lecture 25: The Future of PCVAs Sample Overlays -Have you ever wanted to combine a single audio sample into several new audio channels and use those sound waves as the sample sounds over time? Try this technique using only a single Audio Mixer to combine sounds quickly into new playback sounds! -The Future of PCVAs? In today's lesson, Andrew presents a brand-new technique of creating sound effects using only one Audio Mixer created in a new method - one that should give you full control of the separate sound and make it easy to create all sorts of new and interesting sound effects. At the same time, this technique will create a simple method of saving the separate channels to the very same WAV file so that you can use them all in one program later on. 09e8f5149f
