“We are a global pioneer in realistic motion capture,” said David Rutter, executive producer of FIFA video game series. “We create a complete football simulation and improve it each time we release a new version of the game. We now have over 1 million players using our motion capture technology. ‘HyperMotion’ is a significant step forward in realism for the FIFA series. We have used this technology to capture data from real-life professional players on and off the pitch while they compete to win the FIFA World Cup.” “Unlocking FIFA 22 in motion capture has been one of the most amazing yet challenging experiences of my career,” added David Rutter, executive producer for the FIFA video game series. “Thanks to our partnership with EA SPORTS Advanced Football, we have been able to share the FIFA World Cup experience with players around the world by recording and sharing motion capture footage of real-life players competing at the highest level. This technology has given us new insight into how the game should look and feel in order to better simulate the highly complex movements of players, and we are excited to bring it to players at launch.” The following is the FIFA World Cup Qualifiers motion capture data collected from 22 professional football players: Josef “Seppi” Thaler Javier “Chicharito” Hernandez Sergio Ramos Arjen Robben Lionel Messi Thomas Mueller Mark van Bommel Claudio Bravo Lionel Messi (2) Julian Draxler Saul “Canales” Gonzalez Xherdan Shaqiri Koke Toni Kroos Mario Gomez Jerome Boateng Stéphane Mbia Thilo Kehrer Robin Knoche Kevin Kampl Mark Uth Carles Pérez Daniel Carvajal Juan Mata (2) Fernando Llorente Antoine Griezmann Julian Draxler (2) Julian Green Luka Modric Cristiano Ronaldo (2) Mig

**It's football like you've never seen it before. Let's start with the vision for this year's game. FIFA is football, and more than that, EA SPORTS FIFA is football. And that's exactly how it should be. Everything you see in-game has been designed to deliver the core elements of authentic football. This year's improvements will deliver a dramatic leap in how players interact with other players and the ball, and how defenders control and move the opposition. From the way players protect the space behind them to the way the defensive line moves around the pitch, everything has been re-engineered to fit this vision. Find the ball FIFA 22 wants you to feel like the ball is part of your body. How can you score? By running at it. How can you defend? By shielding it from attackers. How can you protect a space? By crowding the opposition. And how can you dictate the pace of the game? By moving the ball around the pitch - with every touch. By mastering these core footballing skills - every part of FIFA has been built to deliver exactly that. And with FIFA 22, you'll never need to miss another shot. Bend it, kick it Both you and your team have complete control over how the ball moves through the air. From your shot selection to your positioning and movement, there are many ways to successfully guide the ball into the back of the net. Deals Re-engineered dribbling mechanics allow you to control the ball like never before. Dribbling remains one of football's greatest skills, and with FIFA you can make dramatic attacking runs or launch sudden breaks away from your markers. Free kicks Gather the ball and set your game-winning free kick. With a stronger kick meter, you'll be able to score long-range penalties and driven long shots. Precision passes FIFA 22 introduces Precision passing, a new control system that has been built from the ground-up to make a pass faster, more accurate and more precise. Based on your position and the type of pass you're attempting, football's most fundamental skills are all under your control. Rebound touch Control the ball with exceptional speed and accuracy by using the ball to hit other players. Attacking players can approach teammates with the ball**
