Defending a very important colonial port, you must repel the challenge of the small forces of the invading Spanish fleet in order to protect the occupied territories from the threat of the Spanish squadrons. History: You play the part of Germany and have to defend the colony of the Caroline Islands from the Spanish. You have a powerful fleet of four battleships (Von Spee, the König, the Prinz Eugen, the Köln) and five cruisers (the Dresden, the Brunard, the Derfflinger, the Trajan, and the Schlesien). The Spanish fleet consists of two battleships, two cruisers and a supply ship (the Retama). Game "Victorian Admirals Caroline Crisis 1885" Features: : The game is based on the famous incident of the battle of the Caroline Islands (Yap, Caroline Islands). : Game mechanics are different to existing naval combat games. : Realistic. : Careful simulation. : Different campaigns. .From the year 1907, the submarine war began. Thereafter, there were a succession of international wars from 1914 through 1945, with many major naval battles being fought. The Pacific theatre became the venue for most of these battles, and half a dozen great navies were developed in the region to contest power. Millions of lives were lost in these wars, and huge resources were expended in the construction of warships and in shipbuilding. The outcome of these wars was a great degree of domination by the United States Navy. The Japanese, meanwhile, also benefited from the proliferation of warships built and maintained through the wartime period. The British Indian and Royal Navies, in particular, played important roles in many of these battles. A story by D.W., published on ZeniMax.com is worth reading, but there is a link to the article on D.W.'s website. The article, "Fate of one of the greatest imperial navies of the world, the Chinese People's Navy", is well written and gives a detailed and accurate account of China's navy in WW2. China suffered destruction of its navy in the early stages of the war, but managed to get new ships, and later the same year, when Japan occupied many countries of Southeast Asia, it was unleashed against Japan. This includes the war in China, where the Japanese Second Bureau (Underground Navy) played a vital role in stopping those attacks. World

===The Pathfinder RPG Game Play.=== The Pathfinder Roleplaying Game is a d20 based, Hack&Slash Action-RPG with a quirky aesthetic. Choose your character class at level 1 and advance your skills from level 1 to 20 throughout the game. From the imposing hammer-wielding berserker to the light-footed rogue, you'll be creating the character of your dreams! Eventually, you'll equip a set of gear, and can add more gear at level 12. It is possible to spend Mithral Rings to purchase new items. To save your progress, it is advisable to buy a copy of "Pathfinder Beginner Box". You can buy it from Amazon. The RPG is not the same as a board game. Unlike most RPGs, the game is played on a custom random map generator called Fantasy Grounds. This is the biggest difference you will encounter. Fantasy Grounds has a unique proprietary sub-system to handle encounters, encounters and even entire party members. You can ask for any encounter you wish to have on the map in a random manner, and the system handles it. This can make it hard for new players to understand how the combat system works, but also allows players to create and run specific encounters. Fantasy Grounds has a stellar built in community who will help you (without prodding). For years, Fantasy Grounds has been used on the web for its ease of use and its freedom. The community is the largest in games today, and everyone is eager to help. ===Gameplay Hints.=== Using a Fantasy Grounds play-by-post platform is an entirely new experience and learning curve. You might face an issue, and not knowing the answer to it, will require a long and exhaustive Google search. The community and the moderators on the forums at Fantasy Grounds are very helpful. You can also use the Guides section on Facebook, as some guides there are very comprehensive and well written. If you run in to any problems, get in touch with the Fantasy Grounds staff, and they can help you, even if you can't pay for support. ===Key Settings.=== ** Player vs Player** Enemies are dynamic, meaning that you can have more than one encounter on the map at any time. ** Party based** Enemies are grouped by the number of players in your party. This can be useful, especially when the party is larger or smaller than the rest. ** Roll for all** You can

(2 Types). A short description and chart of some content types available within your library. One of these has just been added. Sheets - Records (5 Types). To record the actions, or "plays", you've performed on the library's content items. If multiple plays are being recorded, use a spreadsheet to keep track. This is a play log. Controller - Records (23 Types). To record the plays, or actions, you've performed on your library. Use this record to keep track of what you've been up to. This is a play log. Band - General (3 Types). Several links to help you in setting up your band's library. 3 different types of content will be included. ICR - Events (11 Types). If you stream your bands live, you will need this record type to capture it all - even if it never gets fixed (or recorded). When it has been played, capture one of these record types so that you can find it, even if it has been "buried". OS - Object (15 Types). To better describe the content within your library. Sound Effects (13 Types). To better describe your bands sound and music in a descriptive way. Image - Illustrations (9 Types). We really like what these do, allowing us to make pictures with large numbers of content easily. These can be used to impress guests, even if they are only implied. Password Protected. A simple, additional tab to your PDF record type. Any PDF files you produce (or won) within My Media Use the QR codes to follow the directions step-by-step to get the right PDF, then save when downloaded. Remove this with the Clear button. Equalizer - Audio (27 Types). We've included some audio settings for you. From the main screen, select one of these to explore. You can adjust your settings for AC, MA, Muted, etc. Reverse - Audio (17 Types). If you chose this option to start your music you can use this to reverse your audio. We only intend to use these on our live streams, but if you use the "Skip Intro" option, this can help you to reverse your audio. Are you exactly sure you're in the right area on the Yag interface. There's not a lot of depth to the Yag! interface. You can fix some of that with a friend helping you
