- Download Rld.dll pes 2013 Rld.dll is a programming library for 32-bit Windows application developers. File Rating 3.64. (.rar and.zip).Q: Nokogiri for extracting data from xml Hi I am trying to extract all the @id tags from an xml file using nokogiri Using nokogiri I used: doc = Nokogiri::XML(xml_content) doc.xpath("//@id") But this gives me [Nokogiri::XML::Element:0x3fc3640

{"@id"}] and not the text content inside the tags A: If you want to retrieve all the values in a given tag, you can use.map to do so : doc.xpath("//@id").map(&:text) or doc.xpath("//@id").map(&:text) If you want all the values as an array, you can use.map(&:text).flatten. This will convert your array of strings to a proper array of values, as arrays can only have one type of element (at the time of this writing).
