*****Photoshop Elements:**** Whether you're simply interested in using Photoshop for the fun of it or just a hobbyist, Photoshop Elements is your best starting point. It comes with a free starter kit (see Book IV Chapter 1) and many tutorials on DVD. If you already have a copy of Photoshop, you're in luck — Elements also enables you to edit your images in Photoshop; just use the Edit in Photoshop (discussed next). I recommend starting with Photoshop Elements so you can feel at home with the interface and set yourself up for a successful Photoshop editing career. The following sections show you how to prepare an image for editing, how to enhance your image, how to correct exposure and color, and how to edit out blemishes and other flaws. ## Prepping Your Image When you get an image in front of you, you start with a pre-editing task — usually called `_pre-processing_` — that gets you closer to the image's final form. This section describes the most important steps of pre-processing.

The head of the national police force has admitted the job of policing the world's most watched sporting competition would be virtually impossible without the use of drones. French police officer Xavier Roussel told a parliamentary committee on Wednesday that the use of drones, which have recently become more common, was necessary to track suspects and find missing people. "We can't monitor all the spectators," he said. "We can't go in the stadium." The recommendation by Roussel, who heads the police's elite Gendarmerie anti-terror unit, will likely be welcomed by politicians and football clubs, which have raised objections to the use of drones by police. UK Prime Minister David Cameron recently said the use of drones was "probably legitimate" for the authorities to carry out operations in Britain. In October, French police used an unmanned drone to capture a still from a video showing the brutal gang-rape of a young woman in a park, raising the issue of accountability. The tragic incident put a spotlight on France's law enforcement authorities, which at the time only used helicopters and elite units. The concerns over the use of drones by the authorities were on full display at the heart of French football, the Paris Saint Germain football club. Around 600 PSG supporters chanted "Drones? Drones? Drones?", in reference to the use of the surveillance gadgets, while another handful held up a banner which read: "Protect our privacy". Police said the drone did not come into contact with the fans. The conflict between club and police has its roots in a ticketing row which left club security guards unmoved by an official request that they stop selling the cheapest tickets for matches during the French league season.AKB48 member Mizuki Sakamoto, 21, took home the award for "Best Smile" at the 2019 New Year's Television Awards on Wednesday. The 2019 New Year's Television Awards was held on Jan. 5 at the Nippon Budokan Hall in Tokyo. The full list of winners was as follows: Mizuki Sakamoto Best Smile
