Axalto Egate Drivers V3.0.6.0 Msi [EXCLUSIVE]

[Download](#)

hi, tried to install this driver (axalto-egate) on 3 computers now with setoobox-3 and each time it gives a code 28 error saying this. everything works on the second computer. But I donâ€™t know why it doesnâ€™t work for others, maybe something is missing ... But I don't know what exactly... Added after 10 minutes another error occurs when I change the size of the picture in the control panel (enlarged, reduced, etc., etc.) Last edited by pavlikdriver; 10/06/2018 at 13:22. Reason: Post added Yes, I seem to be doing everything right in the video card settings. It seems to have something to do with the fact that I changed the resolution in the control panel.
