KeyMacro is a very simple solution to use very frequently, for instance, if you often need to convert text to speech (say, "5, 2, 7, 2" in English into "2, 5, 7, 2" in the native language, or vice versa, without having to manually type each of them). To do so, install and launch KeyMacro, and in the "Go" section click "Access." In the "Access Information" section, click "KeyMacro," enter a character and press "Access." To list all the possible keys, click "Access Text to Speech," and after a few seconds, a list will appear. Finally, you can save all the key information. TERMS OF USE: You are free to download and use KeyMacro 3.0, but you may not use it to create a single line of code, modify or sell it in part or in its entirety. You are not allowed to use the code to create executable files. A watermark will appear on the final product, but it is not a copyright infringement issue. Save iPhone backup files as audio files.
